

medisync

Getting To Know Us

MediSync was founded to address the need for accessible, efficient, and cost-effective healthcare services in Australia, focusing on non-emergency medical needs

Public hospitals in Australia face limited medical resources, including a shortage of positions like paramedics and doctors, leading to the import of foreign talent to meet the demand.

We aims to bridge the gap between traditional healthcare providers and patients by utilizing advanced technology and AI to deliver timely medical care.

Problems We Solve

Long Wait Time

Misdiagnosis or delayed diagnosis

High Healthcare costs

Limited Access to Specialists

Inconvenience of Hospital Visits

Lack Follow-up care and monitoring

Our Solution

Automated AI diagnosis Medi Booth

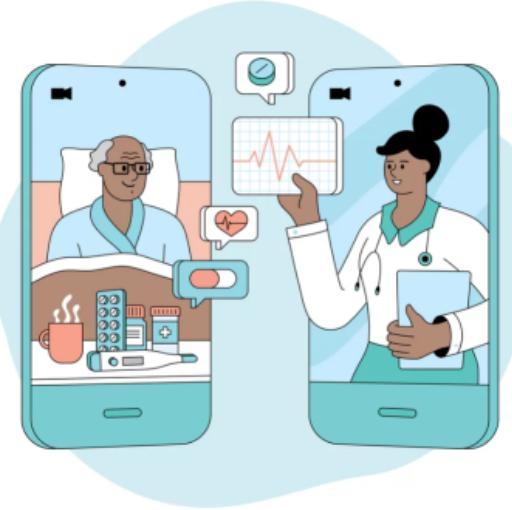

- Basic medical equipment are automated and have the capacity to diagnose independently.
- Stethoscope, Blood Pressure Monitor, Electrocardiogram (ECG/EKG) Machine used for conducting various health screenings
- AI voice recognition and AI assisted diagnosis
- Serve as a platform for telemedicine consultations, connecting individuals with healthcare professionals remotely.
- Equipped with automated medication dispensers, enables patients to conveniently obtain their prescribed medications

Our Solution – Second part Self-Booking Mobile Application

Telemedicine
Consultations

Electronic Health
